## Profile

I'm a full-stack engineer and the founder of **CodeAxis Technology**. I work across the entire stack to build clean, scalable software, and even as CEO I stay fully hands-on with coding, architecture decisions, and feature development. My focus is on creating reliable, efficient applications, solving technical challenges, and turning ideas into polished products that deliver real value

My Portfolio link , refer here for my project and details about me [dejen-portfolio1.vercel.app](https://dejen-portfolio1.vercel.app) 🔗

## Professional Experience

### Mobile Application Developer

Efuye Gela

As a Full Stack Mobile App Developer at Efuye Gela, I designed, developed, and deployed cross-platform apps, collaborating with designers and backend engineers to deliver high-performance solutions for Android and iOS

05/2024 – 02/2025  
Addis Ababa, Ethiopia

### Founder and Lead Developer

CodeAxis Technology

Overseeing engineering at CodeAxis, building scalable front- and back-end solutions, managing integrations, and ensuring high-quality, reliable applications.

03/2023  
Addis Ababa, Ethiopia

### Google Automation Developer

Manny, MKA

Designing automated workflows using Google technologies like Apps Script and Workspace APIs. Creating scripts, integrations, and automation solutions that improve efficiency and streamline business processes

09/2025 – 10/2025  
London, United Kingdom

### Full Stack Developer

Orizen Technology

Building and maintaining both front-end and back-end features to deliver complete, scalable applications.

03/2024 – 09/2025  
Addis Ababa, Ethiopia
